PROJECTS

Automatic Street Light System
Built an Arduino-based system using LDR and relay modules to automatically control street lights based on ambient light, improving energy efficiency.

Human Detection Robot Car
Developed a rescue robot using Arduino to detect humans in disaster zones, assisting rescue operations in inaccessible areas.

Aquatic Ecosystem Management (IoT & ML)
Created an IoT and ML-based system to monitor and predict water quality parameters like pH, temperature, turbidity, and TDS for better ecosystem management.

My Turn – Digital Token Booking App
Developed a mobile app for booking and managing digital tokens, eliminating queues and providing real-time updates for user convenience.
